## AiR-4.2 OSFM With Guard

### Energy Lock Technology

Energy Lock Technology utilizes D30 impact protection, which creates a soft and flexible shock absorbing material featuring unique molecular properties. In standard conditions, the molecules flow freely, but on impact, they lock together to absorb impact energy.

### Air-XE Shell

The boldest helmet design on the field! These radical new looks, plus the best paint colors on the market equals an unbeatable combination. Our newest helmet, the Schutt Air-4.2 Batting Helmet is made from solid ABS plastic with an incredibly comfortable fit.

### AiR Lite HR Guard

Comes with an attached AiR Lite HR Softball Guard. Color of guard is shown on the helmet image. Colors cannot be changed.

### Fitting Information

The lower inside edge of the front pad should be approximately 1 inch above your eyebrows. With your head upright the helmet bill should be parallel to the ground. The helmet should have a snug fit against your head.
